 **VS** 
England Senegal

Sell Bet **Claim Win**

- The MetaBet Smart Contract can be verified by anyone on our github page ensuring complete transparency.

MetaBet Oracle

Truth through decentralized oracle

Oracles

A blockchain oracle is a connection between a connects smart contract and information from the real world. An oracle consists of a pool of independently appointed truthsayer / members who enter outside information into a smart contract. The oracle algorithm determines the result which then triggers action within the smart contract.

Real world events

Oracle

Truthsayers

Decision Matrix

Sport result

Smart Contract

Winners get paid

MetaBet Truth 2 earn Oracle

The MetaBet Oracle is a three stage multi signature wallet oracle controlled by a smart contract. The first stage is a is a Truth2Earn model and the second stage is a Fail Safe mechanism. These three stages will ensure that only 100% accurate truthful results unlock payments to the winners.

1. Truth2 Earn

2. Fail Safe

3. Bet smart contract

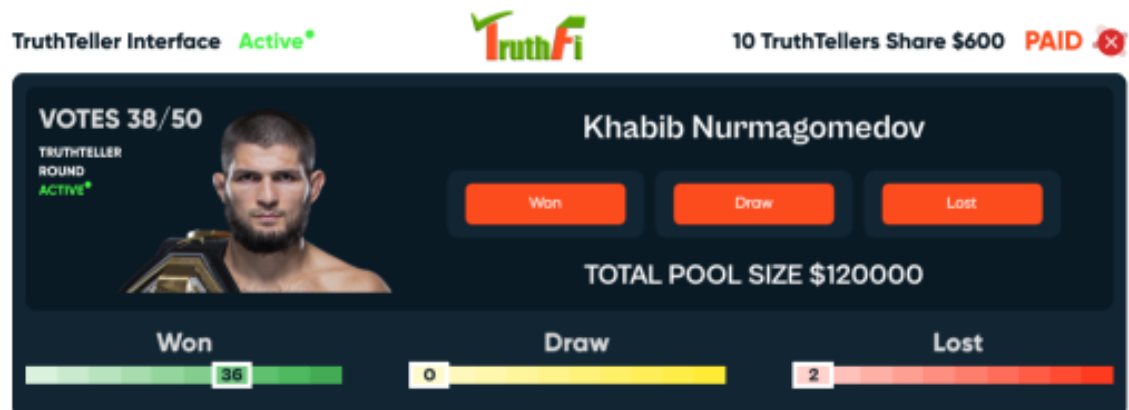

MetaBet Truth 2 earn Oracle

100 % Decentralized Truth Oracle

The MetaBet Truth2Earn decentralized multi-signature, multi-stage truth telling oracle has been created to ensure 100 % accurate truthful results and make it literally impossible to capture the Oracle or change Oracle results.

1. Truth 2 earn Event Result Verification

- Initially a quick result poll vote is made by a Truth Teller using One MetaBet token
- As the Truth 2 earn model grows in popularity Truth Tellers will need to hold TRUE token to be able to take part in result data verification process
- The MetaBet Truth2Earn smart contract collects the event result data over 50% result unlocks the first multi-signature wallet key
- Five Random Truth tellers equally share the respective events TRUE token bounty which starts at \$15 per event

MetaBet Truth2Earn Oracle Fail Safe

TruthTellers verified 0/10

2. Fail Safe

A. The MetaBet Truth2Earn Oracle includes a fail safe mechanism wallet address

B. This fail safe wallet address can only be accessed by the two founders of MetaBet

C. This wallet can adjust the result if any of the previous surveys get compromised.

D. The MetaBet founders have the most to lose at the decentralized multi-signature, multi-stage if the truth telling oracle would ever get compromised.

The founders are only interested in the long term growth of the platform and not short term manipulations which would damage the MetaBet system or community.

E. The MetaBet Truth 2 earn smart contract collects the Fail Safe result which in turn unlocks the last multi-signature wallet key.

F. Only now can the MetaBet Truth2Earn Oracle unlock the payments for the event result prediction winners.

Service guarantee

Customer focused service design

Socially responsible betting

To encourage socially responsible betting any user can restrict the bet amount of their specific wallet or even block their wallet completely.

No KYC

Placing a bet on MetaBetMask.com does not require any Know Your Customer (KYC) process.

MetaBet GOAL tokenomics

Powering free Football match betting

Metabet will partner with sports specific tokens to enable **no fee sports betting**.
The first such token is the GOAL token.

GOAL Token

- Token Name Goal Token
- Blockchain BSC
- Token standard BEP20
- Supply 10,000,000 (Original Supply 100,000,000 90 % burned)
- Ticker GOAL
- Contract owner Renounced
- Price Actively traded on Bitmart / Hotbit / Pancakeswap
- <https://bscscan.com/token/0x438fc473ba340d0734e2d05acdf5bee775d1b0a4>

Future sports specific tokens

Metabet will partner with additional no fee sports betting based on the market potential of each sports betting market.

Roadmap

2022

- Develop platform smart contract factory and front end UX
- FIFA World Cup 2022 Qatar beta test
- Smart contract factory beta testing
- MetaBet Oracle beta testing
- Design user interface user experience
- Develop tokenomics
- Design AI data verification work to earn model
- Prepare documentation offer

Q1 2023

- Incorporation in Costa Rica
- Crypto Blockchain Web3 AI Expos
- Launch Live DAO
- Increased Web3 Result Prediction Events
- Private investment round
- Influencer Endorsements
- Marketing campaign
- Telegram Discord and Twitter airdrop
- Truth token shilling campaign
- Telegram shilling
- NFTS marketplace

Q2 2023

- Launch AI Voice Bet App AiBetApp.com
- Multi wallet connect
- Build brand

Q3 2023

- Advertising campaign
- Gibraltar incorporation
